Fishing Report:

Trout Report:

Trolling Report has been between 8-12' below top speedy shiners and various spoons. Trout bite is reported to be more active when the weather is active.

Bank Report has been Pink Power Eggs, Red-worms, Meal worms, Corn Power Bait, and Chartreuse Power Bait, in addition to Senko worms, and Kastmasters.

Bass Report

Top water Bass-Fishing has been slowing down with the decrease in temperatures. Anglers are reporting Drop-Shotting to 40' near the rock walls and piles in the Narrows. Also, Nail-weighted Senkos.

We did have a good report of activity during the miserable weather on Friday with swim bait. No photo was taken.

Don't forget Anglers! We LOVE fish pictures, and will happily post them on our Facebook Page.
